

Sprint Review — Sprint 2

Sprint goals

Include the sprint goals set during sprint planning and evaluate progress as a team.

Data Analysis

- Be able to sum the profits between dates

Placing Orders

- CRUD operations for orders
- Cart functionality
- Payment and customer input

Order Tracking

- Statuses for orders

Customer Feedback

- Allow the rating and reviewing of orders by customers

Test

- Create a unit test for at least one function

Promotion Running

- CRUD operations for promotions
- Expire after expiration date and no longer usable
- Discount price of items appropriately

Demos

Demo	Feedback
Data Analysis	The functions are a bit rough, but they do what they should do and accomplish the requirements.
Placing Orders	Placing orders is phenomenal, works as intended and goes above and beyond requirements
Order Statuses	Order status tracking works great, it's really nice that the date of status change is recorded and you can see how much time has elapsed since that happened.
Menu Editing and Handling	The menu can be edited and categories can be created with ease and accomplishes the requirements.

Customer Feedback	Customer feedback works well, it's nice that customers can attach their feedback to a specific order they made
Promotion Running	Promotions are simple and easy to work with and all functionality that is necessary exists
Unit Test	The unit test is nice and simple, passes, and is helpful.

Complete tasks

Mark work items "Done" that met acceptance criteria. For items that need more work, determine if they will move to the next sprint or back to the backlog.

Task Completion	
Data Analysis	Done
Placing Orders	Done
Order Statuses	Done
Menu Editing and Handling	Done
Customer Feedback	Done
Promotion Running	Done
Unit Test	Done

Upcoming

Add action items coming out of the sprint review meeting.

No upcoming items, project complete.
